Figure 14

A diagram of a circular device, possibly a disk or a lens. It features a central circular hole. A rectangular protrusion extends from the left side of the main circle. Inside this protrusion is a smaller rectangular feature. Various parts are labeled with numbers: 25 points to the outer edge of the main circle, 26 points to the inner edge of the main circle, 87 points to the central hole, 28 points to the rectangular protrusion, and 29 points to the smaller rectangular feature inside the protrusion.
